

SAURAB NEGI

CAREER OBJECTIVE

As a highly motivated Computer Science student, I possess a formidable blend of analytical prowess, good communication abilities, and interpersonal skills. I am seeking opportunities in a growth-oriented company where I can leverage my skills to benefit the company while having the scope to further develop my abilities. I am eager to contribute to innovative projects, collaborate with talented professionals, and gain real-world experience in software development and technology.

academy, Dehradun, Uttarakhand

PROJECTS

• Voyage Ventures

It is a dynamic, user-friendly platform built with EJS, CSS, Bootstrap, Express, NodeJS, RestAPIs, and MongoDB. It simplifies accommodation bookings for global holidays, ensuring an unforgettable travel experience with just a few clicks.

• Gym Management System

Developed a Gym Management System using JAVA Swing, AWT, and MySQL. This robust system allows seamless addition of trainer and customer profiles, efficient attendance tracking, and offers insights into customer-trainer relationships. It also provides exercise guidance through integrated API for gym equipment, empowering clients to perform exercises effectively.

• Sorting Visualizer

The Sorting Visualizer project is a dynamic web application created using HTML, CSS and JavaScript that showcases the functionality of Bubble, Insertion and Selection sort algorithm by sorting vertical bars either in ascending or descending order, fostering a better understanding of the algorithm's functioning.
